

ATM TRACKING

OWNER SECURITY

- 📍 LOSS MITIGATION
- 📍 DAILY WELL CHECK
- 📍 24/7 SUPPORT
- 📍 INSURANCE SAVINGS
- 📍 HASSLE FREE
- 📍 INSTANT ALERTS

If your ATM is stolen, how quickly can you recover it? Time is of the essence to prevent the thieves from gaining access to the cash. Our company helps you setup an automated system that not only can alert authorities, but gives them an updated location every 30 seconds when a device leaves its location. With this information, you can recover your ATM as well as the cash inside and avoid those troublesome claims.

National Fleet Tracking

Loss Mitigation

With our tracking devices put in every ATM we can aid in your customers apprehension toward loss. Receive a rapid response as soon as an unwanted event occurs to your ATM.

Hassle Free

Our tracking units require no maintenance and are simple to install. Our trackers are literally set it, and forget it. Then, 24 hours per day, 365 days per year, you have security attached to your ATM.

Daily Well Check

Devices perform a self-check daily and report to the cloud server ensuring that, should the time come, you know that it's functioning properly and ready to perform it's security function.

Instant Alerts

We can set up alerts for every abnormal event that may take place. Best of all, YOU determine who, when, and where these alerts go.

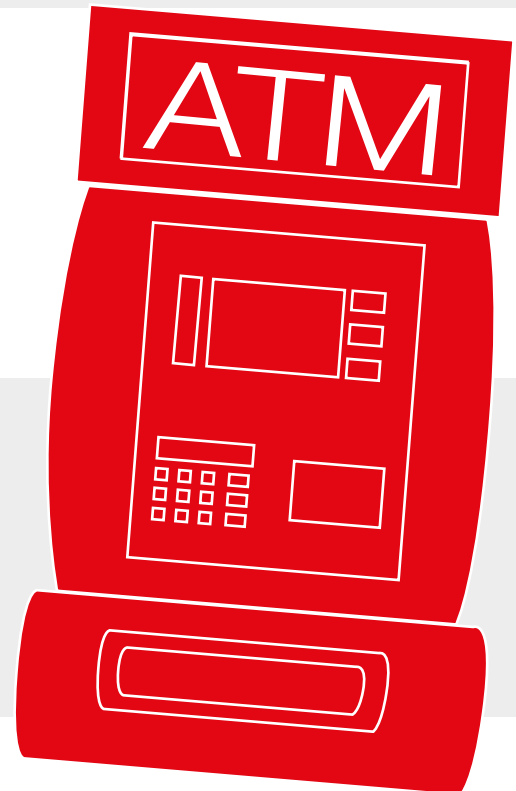

24/7 Support

With every ATM tracker, you are guaranteed that our 24/7 support will be available to assist by phone with any installation needs, troubleshooting, or even help authorities recover stolen assets.

Insurance Savings

Insurance companies appreciate efforts toward responsibility shown by placing GPS tracking on any and all assets. They reward their customers for their security-conscious ATM tracking with discounts on insurance premiums and deductibles.
